Water Use Efficiency Annual Performance Report - 2017

WS Name: SUNVALE ACRES 4TH ADD WATER Water System ID#: 86294 WS County: PEND OREILLE

Report submitted by: Mark Scott

Meter Installation Information:

Estimate the percentage of metered connections: 100%

If not fully metered - Current status of meter installation:

Production, Authorized Consumption, and Distribution System Leakage Information:

12-Month WUE Reporting Period: 12/01/2016 To 12/01/2017

Incomplete or missing data for the year? No

If yes, explain:

Distribution System Leakage Summary:

Total Water Produced and Purchased (TP) – Annual Volume	3,559,400 gallons
Authorized Consumption (AC) – Annual Volume	3,710,000 gallons
Distribution System Leakage – Annual Volume TP – AC	-150,600 gallons
Distribution System Leakage – Percent DSL = [(TP – AC) / TP] x 100	-4.2 %
3-year annual average	5.1 %

Goal-Setting Information:

Date of Most Recent Public Forum: 12/06/2016 Has goal been changed since last performance report? No

Note: Customer goal must be re-established every 6 years through a public process

WUE Goals:

Customer Goal (Demand Side):

Reduce Water Consumption/Outdoor Water by 1% per year through 2022

Describe Progress in Reaching Goals:

Customer (Demand Side) Goal Progress:

Increased public education to encourage water conservation and leak detection through the water newsletter, the Districts webpage, the annual consumer confidence reports, brochures, handouts, and other conservation information.

Continue to repair leaks as detected. Continue to evaluate water rate structures with emphasis on water conservation.

Additional Information Regarding Supply and Demand Side WUE Efforts

Include any other information that describes how you and your customers use water efficiently:

Increased public education to encourage water conservation and leak detection through the water newsletter, the Districts webpage, the annual consumer confidence reports, brochures, handouts, and other conservation information.

Continue to repair leaks as detected. Continue to evaluate water rate structures with emphasis on water conservation.
